#### > Setting Sail | Moving The "Unbridled"

Before this mega yacht named Unbridled could hit the open seas, it had to be moved. Weighing in at 550 tons, 190' long and 34' wide, the vessel was moved onto the yard's drydock system using 40 axlelines of SPMT's. Berard worked together with the client to make sure this move was problem free and that's exactly the way it was, a nice smooth ride into position where it was ready to hit the water the very next day. Soon, this beautiful yacht will be hitting the world's oceans and it's nice to know that Berard had a hand in it. Another successful job done right by Berard!

## > A Holiday Message From The Berard Team

**Merry Christmas  
&  
Happy New Year!**

*From the team at*

# BERARD

SINCE  
1945

As the year draws to a close, we reflect back upon this successful year and think about all the things we are grateful for. One of them is customers like you. We know that you trust our family with your projects and for that we are thankful. It's great customers like you that make our success that much sweeter.

We also thank our team members here at Berard for all the hard work and dedication to the job that puts us on top. Without great employees, there can be no great company, so we thank each and everyone of you.

Looking forward to 2009, we strive to continue our mission of success, and together with great customers and dedicated team members, there's no limit to what we can achieve!

May you and yours have a very Merry Christmas and a Happy and Prosperous New Year!

### > WorkBoat Show 2008 Report

The Berard Booth - A Multimedia Extravaganza!

(L-R) Braedon Berard, Tony Broussard and David Berard strike a pose!

Berard attended the 2008 International WorkBoat Show in New Orleans Louisiana. This was our first year as a participant and we all agree it was a great place to be to reach new customers, as well as visiting with our current ones. We had a great time and want to thank everyone who stopped by the Berard booth to visit, the time spent was very appreciated. We look forward to doing it again next year so watch out!

### > On The Road | Freeport Vessel Moves

They were long and heavy, but they were no match for Berard. These two vessels, a Debutanizer at 300,000 lbs, and a Naptha Splitter at 422,500 lbs, and both about 175' in length had to be moved from the fabricator over narrow roadways requiring power lines raised along with navigating several tight turns to an awaiting barge and then on to the refinery.

Berard provided a turnkey job including engineering, barge load securement and marine transport making it a worry free and convenient experience for the client.
