## > Seeing Double | The Barge Moves

The Berard Team used 20 axle lines of Goldhofer PST-ESE transporters and 2 power pack units to load out these two 650 ton barges onto a 400' x 105' x 25' deck barge. Other equipment utilized on the jobsite included (4) 40 ft barge ramps, (2) 2010 Peterbilt winch trucks with blades and our high volume water pumps.

Berard once again used the incredible maneuverability of the Goldhofer transporters in several steering modes which included carousel, crabbing, and ninety degree steering. The 40 ft ramps were used to load onto the bow due to lack of water depth which made the barge higher than normal above the bulkhead. After the barges arrive offshore, they will be filled with water and placed on top of each other to test lift the massive derrick barge. The job was safely completed in only 2 days.

**Th second barge makes its way up the ramps onto the deck barge.**

**Johnny Berard poses next to one of the two new Peterbilt winch trucks added to the Berard fleet.**

**Second barge moving into position.**

## > A Barge With Attitude

With a barge named Attitude, you'd expect it to be somewhat difficult to deal with. Not so when Berard's on the job.

With 32 axle lines of Goldhofer 8 wide PST-ESE transporters, (6) 26 ft ramps, and (2) Peterbilt winch trucks, this 1150 ton, 250'L x 72'W barge in Amelia, LA was no match for the Berard Team. Once the barge was rolled into position onto the waiting deck barge, it was then lowered onto the customers rigging for launching.

Another safe & successful job by Berard!

## > Berard On The Science Channel | Re Air

As you may remember, Berard was featured on an episode of the Discovery Science Channels new hit tv program titled Heavy Metal Taskforce. In case anyone missed it or can't get enough of it, the show will re-air this Thursday, February 25th at 9:00pm central time on the Science Channel.

Just thought we'd let you know for your viewing pleasure!

## > Employee Spotlight | Hubert Landry

### Hubert Landry | Project Foreman - TV Star

When Berard appeared on The Discovery Science Channels new hit tv show Heavy Metal Taskforce, Hubert Landry had it all under control, literally. Hubert was the operator for the move featured on the show as well as appearing on the series promo spots.

Hubert grew up working and operating heavy equipment in the sugarcane fields of Loreauville and joined the Berard Team in February of 2007. He's been a vital part of the team ever since. Hubert's well versed in operating THPs, SPMTs and various other equipment in the Berard fleet. Hubert holds the reigns as project manager and brings his "A" game on every job to ensure that the client gets the best possible job done in a safe, on time manner.

So next time you see Hubert on your next jobsite, get his autograph and tell him you saw him in OnTheMove!
