> Diving Into 2010 | The Dive Module Project

**Berard provided numerous services for the load-out of this 400 ton dive module in New Iberia, LA. The Berard team first weighed the package and determined the exact center of gravity. Berard then assisted with testing the lift points of the module using 125 ton hydraulic jacks and digital pressure gauges. Once the weight and lifting point's strength was confirmed, the package was ready to depart. Berard utilized 24 lines of PST-SLE transporters to perform the project. The Berard crew transported the module from the fabrication shop to on the deck barge within one day. Once again a flawlessly executed plan to keep the customer's project on time and within budget.**

## > A New Year | A Renewed Plan For Success!

As many have made their New Year's resolutions, (and have probably broken them all by now), our New Year's resolutions are easy to keep. Our plan is to keep doing what we do best, providing the best quality service to our clients. Berard's commitment has never fallen by the wayside and this year we continue to bring the best to the table. Our dedicated Berard Team members are ready to make 2010 another successful one though hard work and determination to make us the best on every project. That's just the way we do it.

We wish all of our valued clients a successful year and look forward to many more partnerships in making your projects great ones!

Sincerely,  
The Berard Team

## > Employee Spotlight | Brady Judice

### Brady Judice | Project Foreman

Brady Judice has worked around heavy equipment all his life. Growing up on his families sugarcane farm, he had the opportunity to operate some of the biggest machinery around. The days of farm life have since past and now it's on to bigger things... literally. Brady joined the Berard Team in February of 2006 and has been a dedicated member who has quickly learned and mastered the latest heavy transport technologies and has gained the title of Project Foreman due to his great sense of leadership skills and planning abilities.

"I like moving the things that other companies can't. I enjoy the day to day challenges that the job brings"  
Brady is married to Laine and has two children Payton and Mia.

All thumbs up on the 1800 ton liftboat move.

Moving 1700 tons, . . . with his fingers.

Launching a 250 ton crewboat into the Bayou Teche.
