> Comin' In | The 1650 Ton Deck Load In

Measuring 160' x 80' and weighing 1650 tons, the Berard Team used sixty lines of spmts consisting of a mix of both SLE's and ESE's. The massive deck was offloaded from a 260 x 72 deck barge into customers yard. Once in the yard the deck traversed over inadequate ground conditions and involved several tight turns. Once again the maneuverability of the spmt's came through to make this colossal project another success story for Berard.

> Ships Ahoy! | The Barge Loadout

It was just another day on the job for the Berard Team loading out this 515 ton, 222' long x 54' wide barge. The vessel was loaded onto the customer's launch barge system using twenty-four lines of ESE's and four power pack units. The team worked hand in hand together with the customer's employees to make the move a safe one, resulting in a job well done and a happy customer.

> Employee Spotlight | Ray Breaux

Ray Breaux | Rigger / Welder

Joining the Berard Team in August of 2008, Ray has become a valued member of the team. His duties include fabricating and welding some of the various equipment used everyday at Berard such as loading ramps etc.

Ray also serves as rigger on jobs in addition to his welding duties. When asked about what he likes most about working with Berard he said “Opportunity to travel”. And travel he does to all parts of Louisiana and other parts of the country with the team. Ray always has a great attitude and a can do spirit that helps make Berard the best!

Ray is married to Trina and has three children Sage, Tray and Alora.

> Equipment For Sale

Berard has equipment for sale from time to time. If you are in the market for some used equipment, check out the for sale webpage at the Berard website. All of our used equipment for sale has been taken care of by our certified employees so you can rest assured you're getting quality equipment.
