The Berard Team was proud to once again take a pinnacle role in transporting the Navy's newest addition to its fleet, the "Coronado", a 418'L x 107'W Littoral Combat Ship (LCS) built with pride by Austal in Mobile, Alabama. Berard provided a turnkey service and accomplished the task using 104 axle lines of self propelled modular transporters. The team rolled the 2800 ton LCS from the final assembly bay to a waiting deck barge. The Coronado was then barged down river for transloading from deck barge to drydock. The entire process was accomplished in only two days. "It was great working on such a prestigious, very detailed and well planned project for our country". "Overall the project was an awesome experience and It was a pleasure to work with a great company like Austal" says Braedon Berard, COO.
