# The Shipyard Launching the City of Bismarck

## Job Specs

**Weight:** 2200 Tons

### Dimensions:

330'L x 94'W x 105'H

**Equipment Used:** 106 axle-lines of SPMTs, 4 power packs, loading ramps, high volume water pumps and winches for barge securement

The Berard Team was proud to take part in the launching of another great asset for our US Navy. The team loaded out the 2,200 ton, USNS City of Bismarck (EPF 9). The team transported the EPF from the client's final assembly building to a deck barge. Once secured on the barge, it traveled down river to be trans-loaded. Once at the transfer point, the trans-loading of the EPF onto the Alabama, an 800' floating dry dock, began. As usual, the trans-load went smoothly thanks to all involved. Through hard work and dedication, the job was completed safely and successfully.

# On The Road A Lengthy Vessel Transport

## Job Specs

**Weight:** 190,000 lbs.

## Dimensions:

170' L x 11' W x 15' 1" H

## Equipment Used:

Custom designed and built  
steerable dolly system

This 140' vessel delivery from the Port of New Orleans to a Baton Rouge area refinery was smooth sailing for the Berard team thanks to proper planning and perfect execution. With an overall length of 170', the Berard team used a custom bolster / dolly system to navigate the narrow streets of New Orleans, then continued on Interstate 10 to the final destination. Berard provided full transport plans including securing plans with supporting calculations to ensure a safe delivery.

# Breakbulk Photo & Video Contest Help Us Win!

**CLICK HERE!**  
To vote for the photo!

The Breakbulk Americas Conference is having a photo & video contest titled “Water Everywhere”. Berard has entered both a photo and a video in the contest. We would love to get your vote to help us win the contest. You can vote more than once—once every hour in fact. Just click the links to visit each contest page and cast your vote. Wish us luck and thanks in advance for your support!

# Heat Exhaustion & Heat Stroke

The heat is on and with it comes the dangers of heat exhaustion and heat stroke. Keep cool and hydrated while out on the job this summer.

### Heat Exhaustion

Heat exhaustion is the body's response to loss of water and salt from profuse sweating. Signs include headache, nausea, dizziness, weakness, irritability, thirst, and heavy sweating.

### Heat Stroke

The most serious form of heat-related illness, heat stroke happens when the body becomes unable to regulate its core temperature. Sweating stops and the body can no longer rid itself of excess heat. Signs include confusion, loss of consciousness, and seizures. Heat stroke is a medical emergency that may result in death! Call 911 immediately.

## Two Types of Heat illness

### Heat Exhaustion

- 1) dizziness
- 2) headache
- 3) sweaty skin
- 4) fast heart beat
- 5) nausea, vomiting
- 6) weakness
- 7) cramps

### Heat Stroke

- 1) red, hot dry skin
- 2) fever
- 3) confusion
- 4) fainting and finally,
- 5) convulsions leading to death if not immediately recognized and treated

# Happy Birthday!
