# Big City Lights! STS Crane Transport

## Job Specs

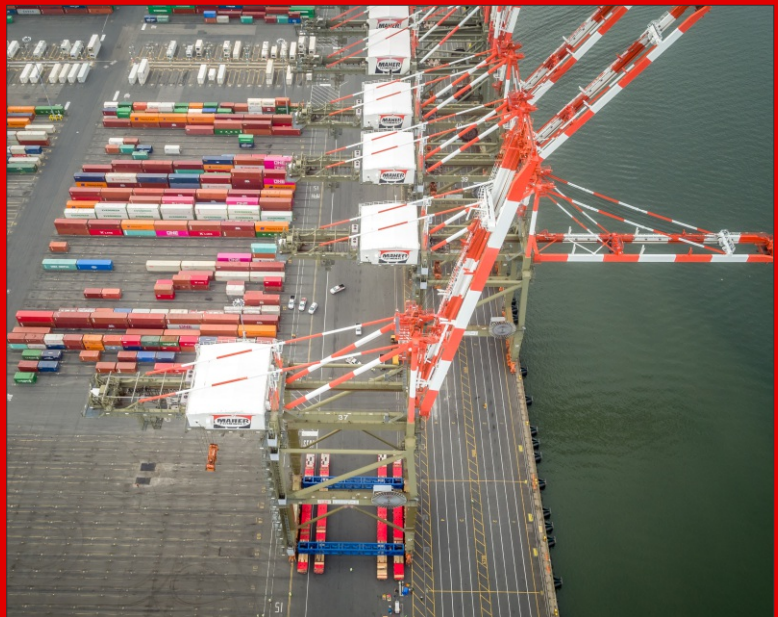

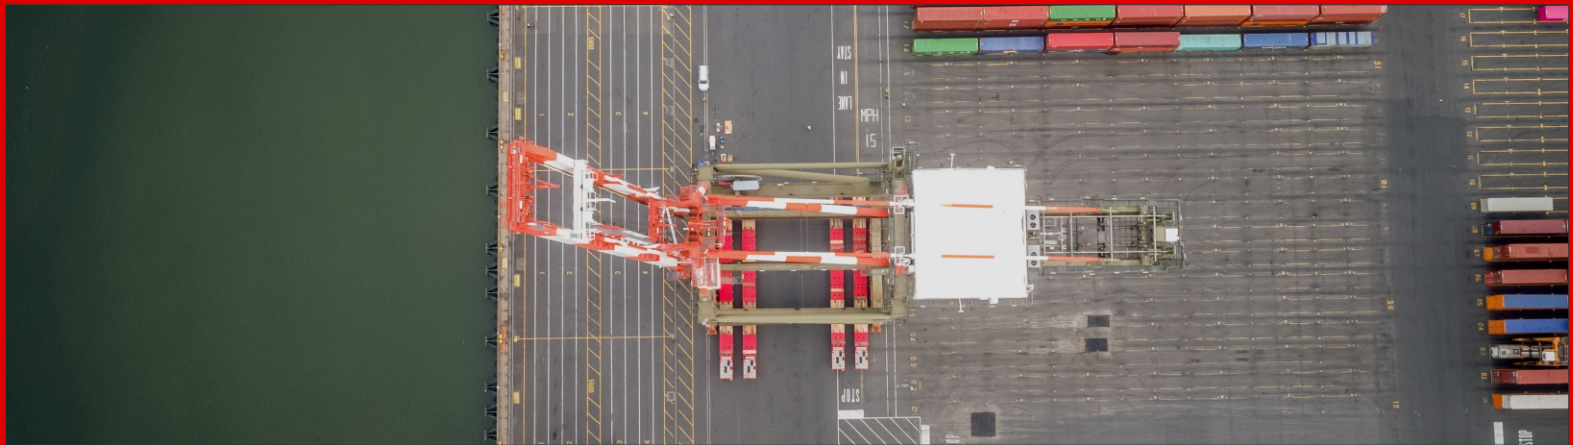

**Weight:** 1,985 Tons

**Dimensions:**  
473'L x 83'w x 214'h

**Equipment Used:**  
92 axle lines of SPMTs & 8  
power packs

The Berard team traveled to the east coast near New York City to transport a colossal ship to shore crane for a major port. The team used 92 axle lines of self propelled modular transporters powered by 8 power packs to lift the 1,985 ton crane from the working rail and transport it to a nearby staging area. Once in position in the staging area, the remaining cranes were rolled past and re-sequenced. The crane was then transported back to the rail and lowered into position. Port crews re-powered the crane and placed it back into service. The Berard team helped the port achieve a fast turnaround as well as minimizing downtime. Congratulations to all of our great team members for working safe and efficiently to reach the goal line!

# On The Road The Component Transports

## Job Specs

### Weight:

690,000 lbs

402,000 lbs

### Dimensions:

38'L x 18'W x 22'H

27'L x 14'W x 20'H

### Equipment Used:

24 axle lines of SPMTs

A critical power plant shipment requires expert planning and execution; this recent delivery of a generator, turbine, rotor, and casings was the perfect fit for Berard in south Louisiana. The team developed a barging plan to receive 5 components on a deck barge from ship cranes and barge via inland waterways to a roll-off site. The Berard team used 24 axle lines of Goldhofer PST-SLE transporters to roll from the barge to dock, then used the same transporters to move over the 4 mile route on public roadways. In 2 nights all cargo was safely delivered to the destination.

# Team Member Appreciation Luncheon & Awards Day

Our team was treated to an appreciation luncheon to show thanks for all they do to make Berard the best. It was a little token of gratitude filled with a good time and some great gumbo enjoyed by all. It was also a day where several team members were awarded for their years of service to the company. Here's to our team, thank you for your dedicated service to Berard!
